#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, Species I (Claims 1-8, 20-22, 29-31, 33 and 34) in the reply filed on 7/23/04 is acknowledged.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8, 20, 21, 22, 29, 30, 31, 33 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berg et al. (5,464,650) in view of De Scheerder et al. (6,572,651). Berg et al. disclose all the limitation of the claims except for the presence of a step of modifying the ratio of the first ingredient with respect to the second ingredient in the coating formulation as the coating formulation is being applied to the stent. De Scheerder et al. disclose a stent comprising two coating ingredients. De Scheerder et al. teach that modifying the ratio of the first ingredient with respect to the second ingredient in the coating formulation as the coating formulation is being applied to the stent to form a transition layer for improving the adhesion between ingredient layers (col. 2, line 47-66). It also known in the art to form transition layer or graded layer between coating layers in order to provide a better adhesion between coating layers. Therefore, it would have been obvious to one having ordinary skill in the art at the time

Art Unit: 3731

the invention was made to employ a transition layer into Berg et al.'s stent in order to provide a better adhesion between coating layers of the stent. Doing so would meet all the limitation of the claims.

4. Claims 1-8, 20, 21, 22, 29, 30, 31, 33 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuch (5,624,411) in view of De Scheerder et al. (6,572,651). Tuch et al. disclose all the limitation of the claims except for a presence of a step of modifying the ratio of the first ingredient with respect to the second ingredient in the coating formulation as the coating formulation is being applied to the stent. De Scheerder et al. disclose a stent comprising two coating ingredients. De Scheerder et al. teach that modifying the ratio of the first ingredient with respect to the second ingredient in the coating formulation as the coating formulation is being applied to the stent to form a transition layer for improving the adhesion between ingredient layers (col. 2, line 47-66). It also known in the art to form transition layer or graded layer between coating layers in order to provide a better adhesion between coating layers. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a transition layer into Tuch's stent in order to provide a better adhesion between coating layers of the stent. Doing so would meet all the limitation of the claims.
